Skills

Front-End Development

React, TypeScript, Vite, Tailwind
CSS, SCSS, Chakra UI, Storybook,
i18n

Back-End Frameworks

Django, Spring Boot, Hono

Databases & Caching

PostgreSQL, MySQL, Redis

DevOps & CI/CD

Docker, Github Actions, Husky,
Jira, Bitbucket

Testing & Quality Assurance (QA)

JUnit, Jest, Playwright

Languages

Ukrainian

Fluent

English

B2

Full-Stack Software Engineer skilled in **React, TypeScript, Django, and Spring Boot**, with extensive experience **architecting** and **deploying** modern, **scalable web applications**.

Expertise includes **Microservices Architecture, Docker containerization**, and **Event-Driven Architecture (EDA)**, leveraging **Redis** and **Celery** for high-volume **asynchronous task orchestration**.

Proven track record of **optimizing application performance** (e.g., boosting performance by **40%** in legacy modernization) and implementing advanced **CI/CD pipelines** (e.g., reducing build execution time by **50%**). Developed sophisticated **AI-powered conversational flows** using **LangGraph** for next-generation user engagement.

Work Experience

Meduzzen

March 2024 - April 2024

Frontend Developer

Remote

🔗 <https://meduzzen.com/>

1. **Developed and validated key website components** using **React** and **TypeScript**, significantly improving and maintaining overall **UI consistency** across the platform.
2. **Integrated Axios and Redux** for centralized state management and efficient asynchronous data fetching from the backend.

WinWin.Travel

May 2024 - Dec 2024

Frontend Developer

Remote

🔗 <https://www.winwin.travel/>

1. **Optimized** website responsiveness across mobile and tablet devices using **React** and **TypeScript**, resulting in a quantifiable **20% improvement in mobile user retention**.
2. **Engineered a real-time chat system** leveraging **WebSockets**, enabling seamless user-AI interaction and successfully **reducing filter selection time by 50%**.
3. **Implemented** a dynamic, interactive **onboarding tutorial**, which directly contributed to **boosting new user engagement by 30%**.

Freelance

Dec 2024 - Feb 2025

Software Engineer

1. **Re-architected gateway microservice logic** within **Docker** containers to implement an **Event-Driven Architecture (EDA)**, ensuring secure and immediate balance synchronization after **blockchain transactions**.
2. **Engineered external API integrations** with real-time **webhook** callbacks, delivering instant balance updates and reducing client-side data discrepancies (**desyncs**) by ~**40%**.
3. **Developed** a sophisticated, multi-agent **conversational engine** using **LangGraph** (LangChain), enabling a celebrity-persona bot with integrated **Dialogue State Management**.

Massive

March 2025 - June 2025

Frontend Developer

Remote

1. **Re-architected** and **Spearheaded** the modernization of a monolithic legacy project into a high-performance **Single-Page Application (SPA)**, increasing overall **development efficiency by 50%**.
2. **Architected** and **implemented** a centralized **Component Library** using **Storybook**, standardizing UI consistency and accelerating feature deployment across multiple teams.
3. **Established** a multi-layered **Testing Pipeline (Playwright E2E, Jest Unit)** and **optimized CI/CD workflows (GitHub Actions)** to reduce test execution times by **50%**.

WWG

Aug 2025 - Present

Front-End (React + React Native) Developer

Remote

🔗 <https://www.wwg.it>

Engineered cross-platform features using **React Native** and **React** for simultaneous deployment across web and mobile applications, ensuring unified codebase and rapid feature parity.

Collaborated within an **Agile** team structure, utilizing **Jira** and **GitHub** for iterative development, code review, and efficient delivery of business requirements.

Education

Kharkiv Radio Engineering Applied College

Professional Junior Bachelor

Computer Science

National Technical University "Kharkiv Polytechnic Institute"

Bachelor Degree

Computer Science

Projects

Alexandria

Nov 2023 - Feb 2024

🔗 [Github](#)

Alexandria – A platform designed to streamline communication between students and teachers by integrating assignment management, flexible scheduling, teacher directories, and discussion boards into a single interface.

1. **Engineered a Full-Stack** platform utilizing **Angular** (Frontend), **Spring Boot** (Backend), and **PostgreSQL** (Database), delivering a scalable solution.

2. **Led** a cross-functional development team, using **Docker** for containerization and **Trello** for agile coordination, successfully achieving a **60% faster project turnaround**.

3. **Designed** and **implemented** an intuitive user interface, which measurably **increased user engagement by 20%**.

Volunteering

National Technical University "Kharkiv Polytechnic Institute"

October 2024 - February 2025

Remote

Frontend Team Lead

- Implemented responsive and visually appealing layouts for various website components.
- Lead a student team of designers and developers to ensure consistent design and functionality.
- Performed a code review of the other developers' pull request
